Bundling and Spiral Wrapping

Extruded profiles, glass tubes and flexible coils

Collation

Ball bearings, glass bottles and match boxes

Masking for surface protection

White goods
Metal and acrylic surfaces
Painted surfaces

STRETCH CLING FILM

TREIFLEX[®] Stretch Cling Film, like a rubber-band, stretches and has the ability to retract, thus holding the packed load tightly together. The film is stretched during application and has a natural inbuilt cling to seal to itself. Flexo Films is the only Indian company to offer a choice of Stretch Cling Films between PE-LLD and PVC as base polymers.

KEY FEATURES

Self sealing film

Available in a wide array of widths, lengths and thicknesses

Holds together pallet loads of upto 2000 kilos

Tailor made sizes to suit any application

Ensures total protection against dust and moisture, thereby eliminating the use of secondary packaging materials

Great optics

Eliminates the use of metal or plastic hoops – ease of application cuts on cost and time

Resilience – to hold almost any shape

Provides pilfer proof packaging

Available in power pre-stretch Machine Wrap as well as in easy Hand Wrap

QUALITY

ISO 9001: 2000 compliant

A product of TQM practices

Produced on sophisticated blown film lines with complete process automation – to ensure consistency in quality,

Raw material inputs matching international standards used

Super tens
