Pack Expo

Dynamic Conveyor will be displaying our DynaCon® Modular Conveyor Systems at Pack Expo in Chicago from October 29 to November 2. Visit us in the East hall at booth #7940 to learn more about our current and future products.

Split Belt Conveyor

This new DynaCon® Split Belt Conveyor allows the bottom of the packages to be exposed for viewing, labeling or bar code reading while on the conveyor belt. Size of the opening is determined by the customer. The Split Belt Conveyor uses DynaCon components and Intralox belting and is compatible with all Dynamic Conveyor products.

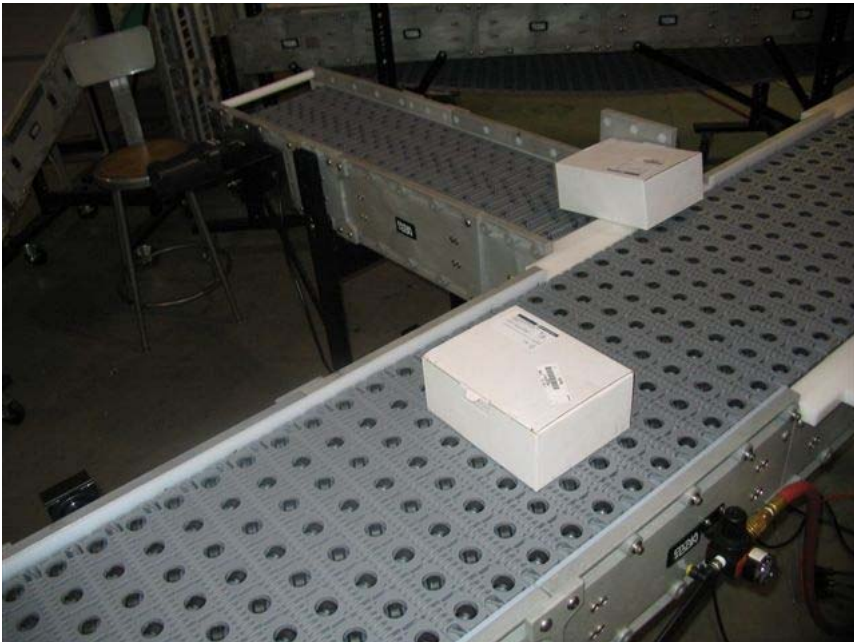

New Belt Option for Packaging

The DynaCon® Modular Conveyor System has added a new belt for packaging applications. This new, low back pressure belt is excellent for straight run packaging applications where significant product accumulation occurs or where general delicate package conveyance is required.

Radius Turn Conveyors

As either a new installation or an addition to an existing DynaCon® Conveyor System, the versatile Radius Turn Conveyor allows customized package flow. One conveyor belt and special injection-molded ribbed sides are used to make the required turn(s).

Futuristic Conveyor

Be the first to see the next generation of DynaCon Modular Conveyors. This new conveyor is being designed specifically for the packaging industry. Using the award winning Intralox Angled Roller™ Belt, Dynamic Conveyor is designing the first plastic modular conveyor system that allows alignment, singulation, un-scrambling and sorting of packages without the addition of ancillary devices. This new conveyor will be fully automated to avoid risks to worker safety and save on labor costs. Be the first to see the latest innovation for the packaging industry by stopping by the Dynamic Conveyor booth at Pack Expo.

Pack Expo Registration

Advanced visitor [registration](#) for Pack Expo is \$25 on or before October 10, 2006. The price increases to \$50 after October 10th. [Register today](#) and visit us in booth #7940 to learn more about our products!

**October 29 –
November 2, 2006**

**McCormick Place
Chicago, Illinois USA**

*Our conveyors **assume any position...again and again and again!***
